## SUMMARY

A highly analytical and communicative professional with a unique blend of a Social Science degree from Olabisi Onabanjo University and dedicated technical training in software engineering. My academic background has honed my core competencies in research, data interpretation, and team management, which I now apply to the tech landscape to understand user needs and drive project success.

I am actively building expertise in Python and Java, with hands-on experience developing robust backend systems using Django and FastAPI frameworks. I am passionate about writing clean, efficient, and reusable code to create seamless software and web applications. My goal is to leverage my distinctive perspective to contribute to innovative and user-centric technology solutions.

## CAREER OBJECTIVE

Aspiring full stack developer with a solid foundation in backend development. Eager to apply my knowledge and internship experience in a challenging role. Passionate about learning new technologies and contributing to impactful projects while growing as a professional developer.
